## **Briefing 2024 at Marlow (Higginson Park)**

Good Evening

Fabulous day of racing and well done to all crews.

Key considerations for tomorrows race.

There is currently a tree across one of the bridge arches at Cookham Lock, please use another arch.

Bray Lock, Please portage long and get in 50m further down along the footpath

Romney Lock is now a longer portage. Please follow the marshalls instructions, and Old Windsor Weir will be a compulsory portage.

Between Bell lock and Staines there is a tree across the river - it is passable at the edges.

Teddington Lock - support crews access on right hand side of lock cut upstream of footbridge - there are EA work vessels moored on the left.

There is a possibility that if the Tideway remains on Red boards, we will have to finish the race at Teddington Lock as opposed to Thames Young Mariners. We are looking to resolve this matter with the Port of London Authority when they next review the tide levels, which will be at 2am.

Paddlers and support crews will receive an update on the finish line location at the start tomorrow.

Please remember that the race is staying on GMT. If your clocks have automatically gone forward an hour for daylight saving, you can use https://time.is/GMT
